

COVID -19

**FR\***

Point of Care Risk Assessment

## DID YOU KNOW?

**Our knowledge of the COVID-19 virus continues to evolve.**

This point of care risk assessment and the BCEHS recommendations for PPE reflect current best-practices, but are **subject to change** as we learn more about the COVID-19 infection and as the scientific evidence emerges.

### SYMPTOMS

\* Temperature as tested by the patient  
\*\* Not due to seasonal allergies or known pre-existing condition

## What to ask?

Do you have **any of the following symptoms?**

- A fever over 38 degrees Celsius\* **or** symptoms of a fever (fatigue, chills, sweats, muscle aches, light headedness)
- New onset of a cough **or** worsening of a previous cough\*\* **or** shortness of breath
- Sore throat
- Runny nose
- Headache
- Loss of sense of smell or appetite
- GI Symptoms of diarrhea, nausea and/or vomiting

### TESTING

Have you **tested positive** for COVID – 19 and/or been swabbed and **pending test results?**

### THE LAST 14 DAYS

**In the last 14 days, have you:**

- Returned from travel outside of Canada?
- Been in close contact with anyone diagnosed with lab confirmed COVID-19?
- Lived **or** worked in a setting that is part of a COVID-19 outbreak?
- Been advised to self-isolate **or** quarantine at home by public health?

## THE BOTTOM LINE

**Please review all BCEHS Practice Updates, Safety Alerts, and Education Announcements** to ensure you remain up to date on the COVID-19 infection prevention and control strategies and health and safety guidelines.
